

CATALAN EXHIBITORS MWC 2023

27th February to 1st March

Barcelona, the Mobile World Capital

Catalonia, your Tech Hub

Catalonia has always had a strong industrial sector, which has today become an eager mobile industry client: ICT, business solutions, retail and smart cities represent the sectors with which mobile companies more frequently work. Other important sectors include transport, health and public services. ICT is also closely related to activity in Smart Cities, the Internet of Things, m-health, gaming, e-commerce, 5G, cybersecurity, blockchain, artificial intelligence or quantum computing, all of which are highly active sectors in Catalonia.

From 2012 to 2023 Barcelona will be the Mobile World Capital. This means that not only the international flagship mobile event will be held yearly here, the MWC Barcelona, but a whole range of activities and programmes all year around will create a dynamic professional ecosystem for the mobile and its satellite industries. This initiative has transformed Barcelona into the permanent global centre for mobile technologies, has involved the development of a business environment focused on this type of industry on an international level and has made Barcelona a global benchmark for mobile transformation.

New sectors like e-commerce, digital gaming, artificial intelligence and the rest of industry 4.0 related sectors are growing thanks to its business advantages and to the projects taking place in Barcelona as a result of the city being Mobile World Capital. One of the biggest pools of skilled workforce in Europe and the appeal of the city as a place to live and work have also progressively consolidated a hub of talent and opportunities on a European level.

How can your company take advantage of this dynamic environment?

Many public-private projects are channeled through the Mobile WorldCapital Barcelona. The capital also provides different opportunities for start-up initiatives as a hub (space for companies): privileged contact with key operators, networking opportunities, awards, among many others. Thus, Catalonia has become one of the major start-up hubs in Europe with more than 2,022 start-ups.

Catalonia Trade & Investment helps international companies locate and grow in Catalonia and Barcelona

Catalonia Trade & Investment is the Catalan Government agency for foreign investment and business competitiveness. With nearly 1,500 investment projects brought to life and over 35 years' experience helping international companies operate in Catalonia, we know how to maximise the return on investment.

Catering to the needs of all international investors

- Are you considering a new investment?
- We can help your company to take the right decisions, providing the necessary added-value information.
- Do you need us to accelerate your investment in Catalonia?
Our project management services give personalised support to your investment right from the start.
- Do you want to grow, reinvest & expand your investment in Catalonia?
Aftercare, expansion and reinvestments are one of our priority activities.

Specialised one-stop-shop services

- Investor information
- Business location
- Financing & incentives
- International mobility for executives
- Innovation, tech & business partners
- Business and institutional network
- Supplier search

Catalonia and artificial intelligence

Catering to the needs of all international investors

Technology is an indispensable part of how societies face their challenges, and, in particular, solutions based on artificial intelligence (AI) are showing great potential in addressing them. In recent years, the application of AI to robotics has meant a qualitative leap in the present, and also in the future, for the well-being and improvement of people's quality of life in different areas: from mobile apps and sensors that monitor and warn in case of emergency, to robots that accompany and assist people in need. They are tools that have and, above all, will have a positive impact on people's daily lives.

How can assistive robotics and AI help citizens?

Robots are automatic machines that can be programmed and designed to make decisions based on probabilities and adapt their functions to the environment in which they operate.

AI applied as software to robots (which would be the devices or hardware) allows them to optimise their responses with use and learn how best to interact in each situation. Its application at family, business and medical levels can be a key element in improving people's lives.

The Catalonia Pavilion at MWC exhibits new AI solutions applied to robotics

The Catalan Government is promoting an AI strategy to make Catalonia an international benchmark in research, innovation, talent generation and attraction. The aim is to become an attractive territory for companies and investors in this field.

Find out how assistive robots can play a key role in meeting the daily needs of different groups. In the demonstration space of the Catalonia Pavilion (located in Congress Square, CS200) you will be able to experience live how AI, integrated in robots, is innovatively applied in a domestic, industrial and healthcare environment.

You will meet Guim, Nug and Blanca: three examples of how technological innovation will make people's lives easier and, what's more, in Catalan.

See you there!

OPEN COSMOS

Sectors

*Satellite, Design, Manufacture,
earth Observation,
Communications, IoT, data*

Open Cosmos is a space company that operates satellite missions from start to finish. It offers a comprehensive service that addresses the entire value chain of the space sector, covering the design, manufacturing, mission management or launch of satellites tailored to companies, institutions and governments around the world. These satellites are used primarily for three things: collect critical earth data for economic, environmental, or security decisions; provide telecommunications services on a global scale; or develop space science and technology.

Outvise

in 

Sectors

robotics, social robotics, AI, navigation, perception, HRI

PAL Robotics started in 2004, when a small group of engineers built the first fully autonomous humanoid biped robot in Europe. With over 16 years of experience in R&D, today we are known for our humanoid and mobile robots used for research, logistics, retail and social applications for companies, institutions and labs.

Our mission is to enhance people's quality of life through service robotics and automation technologies.

We design and manufacture highly integrated and reliable solutions for service industries and research institutions worldwide. We help our clients integrate robotics into their organisations, fully adapted to their project and or business needs.

Sateliot is launching the first LEO satellite constellation based on the 5G standard, allowing commercial unmodified cellular IoT devices to connect from space. This is the first time in history that cellular terrestrial telecom is merging seamlessly with satellite connectivity and Sateliot is leading this revolution. Sateliot's cost-effective technology and the possibility to use commercial low-cost (<\$5) devices to connect to satellite opens infinite possibilities on the untapped market of massive IoT in remote areas, and it is in line with Sateliot's mission to make IoT connectivity available everywhere and to everybody.

Sectors

GIS, Mobile Mapping, Software development, Drone, Data capture, ICT tools, LiDAR, UAS, UAV, Drone manufacturer

SITEP has three areas of expertise:

Since 1998 the Engineering Firm specialized in the development of territorial solutions, offering customized GIS & ICT tools and consultancy services to companies, public administrations, and security and emergency services.

The Mobile Mapping Division collects and processes high-precision data from vehicles with onboard combined sensors. Our most demanded are LiDAR, thermal, multispectral, and RGB images.

The Aeronautic Division designs and manufactures helicopter-based UAVs. Adapting the aircraft to specific needs and achieving some of the highest payload and flight time capabilities of the market.

These three areas combined result in complete geolocated Unmanned Aerial Systems.”

MWC Open Innovation Challenge 2023

The MWC Open Innovation Challenge returns to MWC and FYFN 2023

MWC Open Innovation Challenge 2023 is a B2B meeting event between corporations with open innovation challenges and other corporate venture projects, and investors on the one hand, investors, and start-ups and solution and tech providers on the other.

We have set up a portal where corporates can register, publish their challenge, and arrange meetings with technology suppliers (start-ups, SME, R&D institutions and universities) from all around the world. Corporations and investors participating enjoy dedicated support from our team in identifying relevant partners to meet according to their interests. Technology providers that have the potential to help solve these challenges can register to participate in the event and upload their details on the solutions they can provide.

The participation will allow to connect with the most disruptive solutions, and it is a great opportunity to:

- Identify potential international partners
- Meet targeted companies and decision-makers
- Complement your visit to the congress with a personalized agenda of meetings

When?

27th February to 1st March (dates dedicated exclusively for physical meetings)

6th to 10th March (dates dedicated exclusively for physical meetings)

Where?

Physical meetings will take place inside Fira Gran Via, in Congress Square, behind the Catalan Pavilion. Exclusive for Corporations and Investors; startups and tech providers with previously arranged meetings with them. **The virtual meetings** will be held using the videoconferencing tool of the event's platform.

Where?

Sign up in <https://mwc2023.b2match.io/> before 20th February, it is free of charge. We will provide a free pass to MWC congresses if you have at least one physical meeting.

The MWC Open Innovation Challenge is hosted by ACCIÓ (the Catalonia Innovation Trade & Investment agency) and Enterprise Europe Network.

Contact us:

<https://www.accio.gencat.cat/open-innovation-challenge>

inint.accio@gencat.cat

+34 93 4767200

Reach your business goals by joining us at the MWC OPEN INNOVATION CHALLENGE!

Open for startups and tech providers from November 30th.
From February 27th to March 1st will be only physical meetings between corporates/investors and technology providers. Physical meetings will take place in the venue of MWC/4YFN congress in Barcelona.

Other meetings will be online on separate days between **March 6th and 10th.**

Solutions required:

Technologies:

*Artificial Intelligence, Metaverse,
Machine Learning, Chatbot*

Opportunities:

Looking for platform solutions

Lisandro Bril - Technology Ventures

Technologies:

*Circular Economy, Cleantech,
Bioeconomy*

LISANDROBRIL

Opportunities:

Solutions for circular economy and agritech

LG**Technologies:**

Smart Building, Home Appliances, Smart Materials, Circular Economy

Opportunities:

- New features, accessories or services for "Upgradeable Appliances"
- Solutions reflecting new life trends in Home Appliance and Air Conditioning Systems
- Innovation for material, components, and control for Home Appliance and Air Conditioning Systems
- Future transformation of Home Appliance and Air Conditioning Systems
- Solution for enhanced energy efficiency

Fluidra**Technologies:**

Artificial Intelligence, Wellness

Opportunities:

- Swimming Pool and Wellness Innovations
- Gamification in swimming pool environment
- Automatic tracking of consumer goods

RACC**Technologies:**

Mobility, Security

Opportunities:

Tech and Services focused on Mobility and Personal Assistance

Familia Torres**Technologies:**

AI, Circular Economy, New Materials, IoT

Opportunities:

Innovative solutions for wine production process

Vestel International

Technologies:

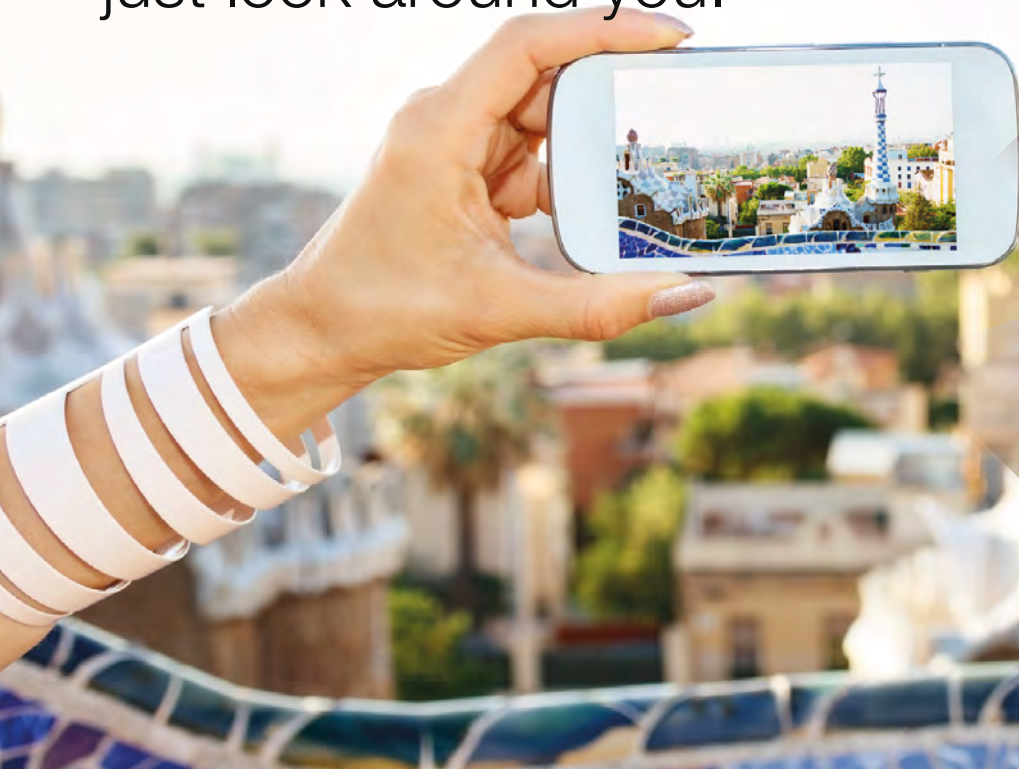

Gamification, Smart Building, Web3

VESTEL

Opportunities:

- Creative Content Marketing
- Food recognition
- Smart Home Energy Storage
- Inventory management for Refrigerators (and other related spaces) through Smart Home Mobile Applications
- Data monetization

If you need proof that
Catalonia is **business friendly**,
just look around you.

Catalonia Trade & Investment works for you.

With more than 35 years' experience, Catalonia Trade & Investment is the Catalan Government agency for foreign investment and business competitiveness. Its specialised one-stop-shop services include project management, business location, financing & incentives, international mobility for executives, aftercare services, innovation, tech & business partners, business & institutional network and supplier search service.
